

LOOSE AND FIXED CONTAINER LASHING EQUIPMENT

MEC is your one-stop shop for fixed and loose container lashing equipment. We provide top-notch container securing products crafted with superb German engineering. You get the complete package: from initial brainstorming to design, from prototype to type approval. We are a self-sufficient provider with powerful fabrication capabilities including in-house casting, swaging and welding facilities. This broad manufacturing line-up ensures single-source reliability. Our independence from outside component suppliers permits realization of highest quality standards. In addition our entire manufacturing process is continuously monitored by stringent in-house quality control. Our operations are ISO 9001-certified and carry all DNV-GL, LR, BV and ABS welding certifications.

However challenging your application, MEC will meet and exceed your expectations. Our engineers are as skilled in upgrading existing systems as they are in creating custom-designed new systems and components. All components and accessories developed and manufactured by MEC are approved by the classification society. Your new product is accompanied by valid type approval certificates and, upon request, by batch test certificates.
